

EDGE.
STYLE AND
STRENGTH.

INSPIRED BY EXPERTS

For decades, we've been serving architects, contractors and trade partners worldwide with high-performance collections. That's why all our products are made to a standard an expert would expect.

Today, you'll find a range of quality products for your home renovation, alongside performance models for professional projects like public spaces and high-end hotels.

We push ourselves to achieve new levels of efficiency and sustainability in everything we do, offering impactful design. Meanwhile, our years of experience have taught us that there's always a better, more elegant solution. We never rest until we've found a way to offer you a higher standard.

EDGE. STYLE & STRENGTH.

Working with industry leaders every day, we know contemporary design isn't just about the style. It's about the strength that comes with excellence in modern manufacturing. Precision-engineered by our experts, the EDGE collection has both in equal measure. This is what gives us the edge on design.

STYLE

MINIMALIST

The EDGE – clean, defined, streamlined.

This minimalist collection is inspired by a return to the essential in design and architecture, with an emphasis on quality materials and simple geometric shapes. Our ongoing conversation with experts means we can bring you the latest developments from the design world.

ESSENTIAL

Modern and uncluttered, this pared-back collection is about quality. An understated chrome form shifts the focus to function. This is a purposeful, hard-working design with an appearance that underscores its performance.

STREAMLINED

Creating for industry, our engineers have years of experience combining high-performing, heavy-duty features with light, minimal design. We've become experts at finding innovative ways to streamline technology while maintaining quality. This expertise means the taps we make for your home are some of the slimmest on the market.

SEAMLESS

The neutral, uninterrupted lines of EDGE blend seamlessly to its design environment. With a clean, continuous shape, this collection gives you the versatility you need. EDGE was created for creativity.

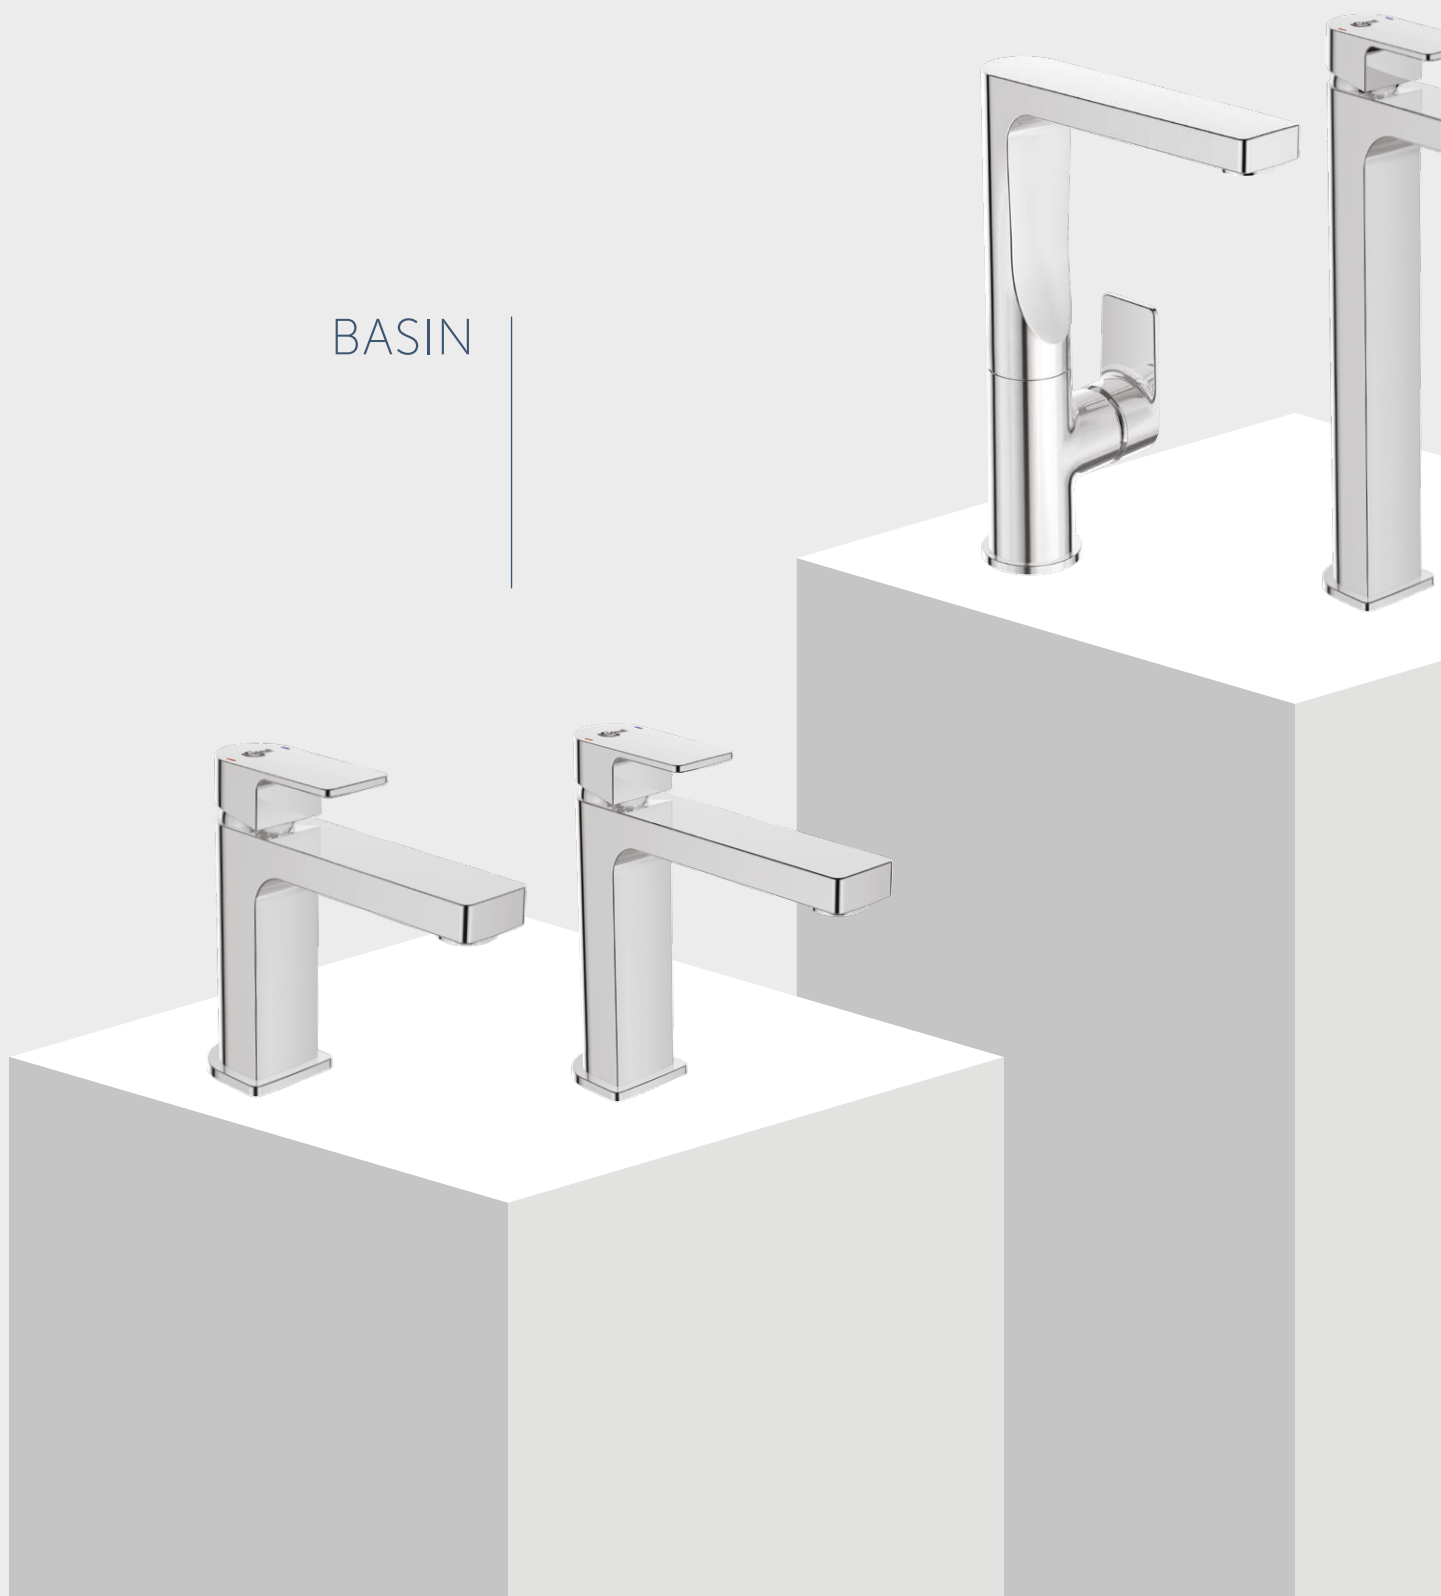

VERSATILE

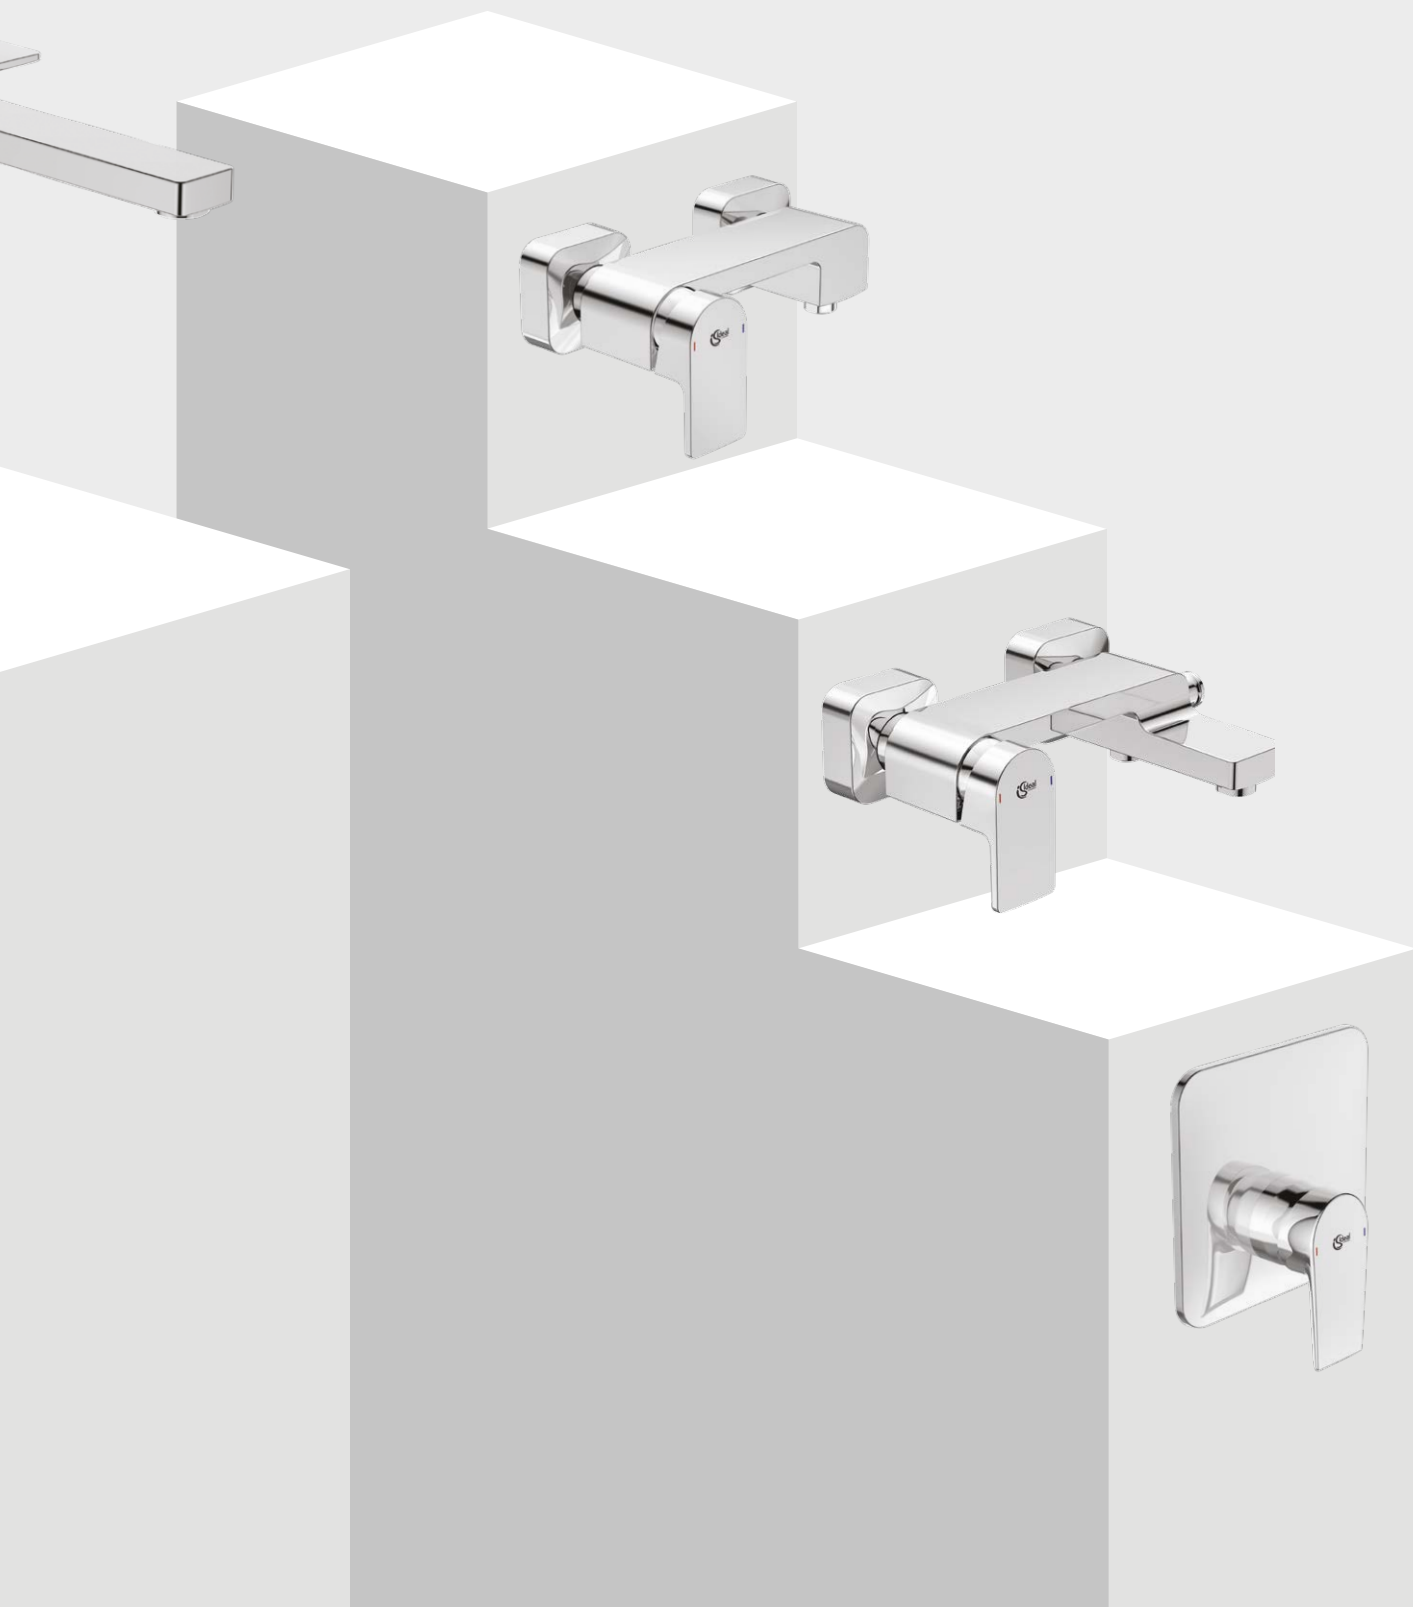

Discover mixers for the bath, shower and basin in this wide collection for every configuration and function. With varying heights and features, you'll find the perfect piece for your bathroom.

HIGH SPOUT
AND VESSEL

BASIN

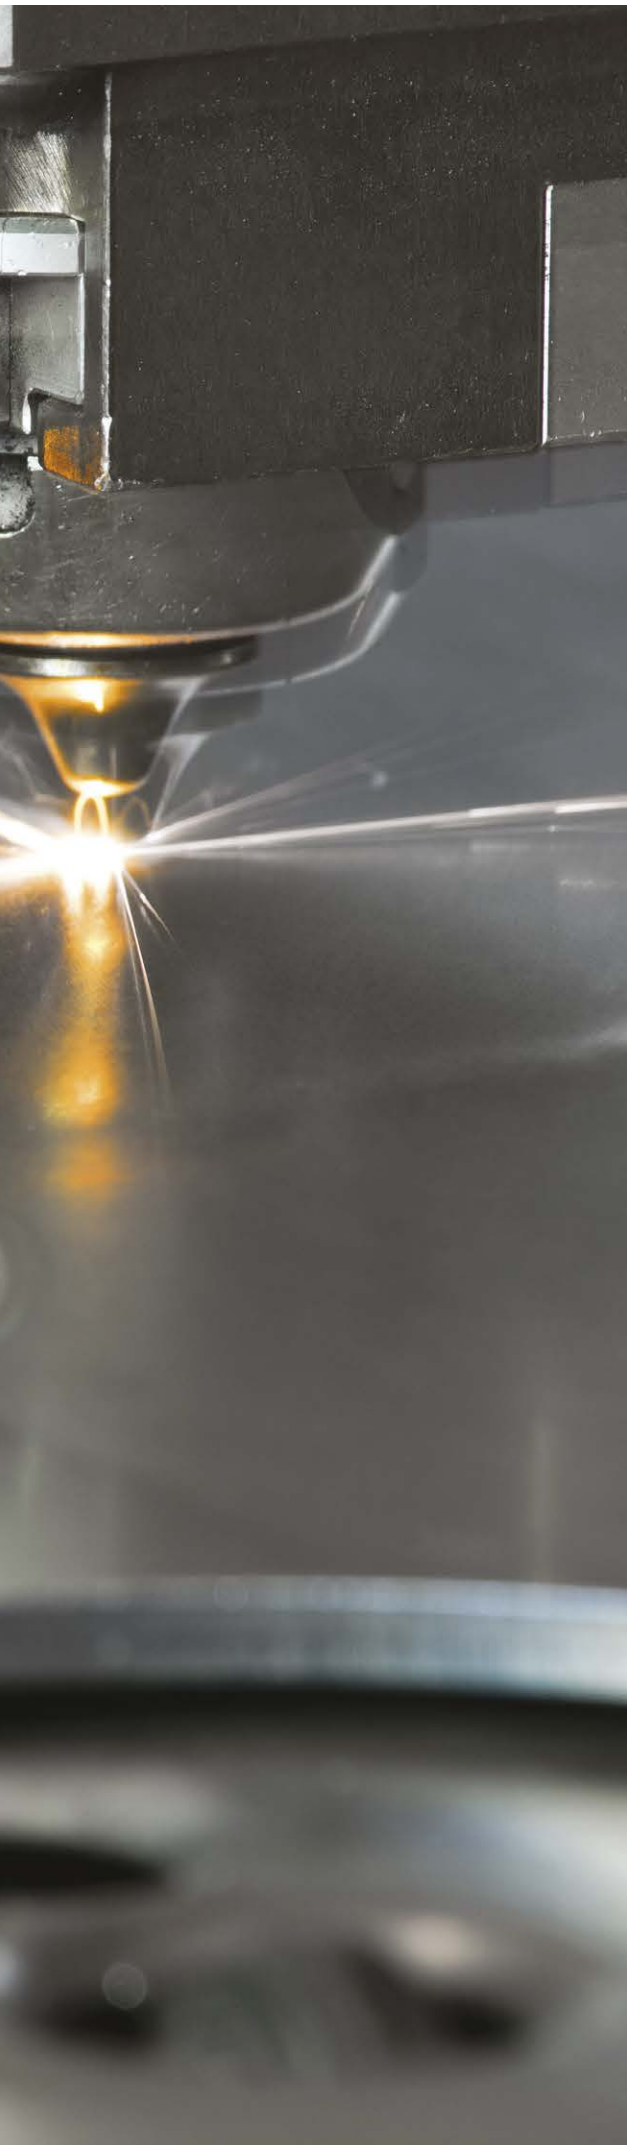

BATH AND SHOWER

STRENGTH

PRECISION ENGINEERED

EDGE was precision-engineered by us. We take great care over every part of the process at our factories across Europe. From the design development to the manufacturing and testing stages, our focus on excellence and quality materials never wavers. This is how we can guarantee perfect performance in your tap.

ENDURING

We build our products to last. Everything that leaves our factory has been tested to the limit. We subject our brass to burst pressure at 60 bars so we know the casting is strong. We push our products through thermal shocks to replicate the most demanding conditions. As a mark of our confidence in EDGE and for your peace of mind, this collection comes with a five-year warranty. This is our promise of quality to you.

5 YEAR
GUARANTEE

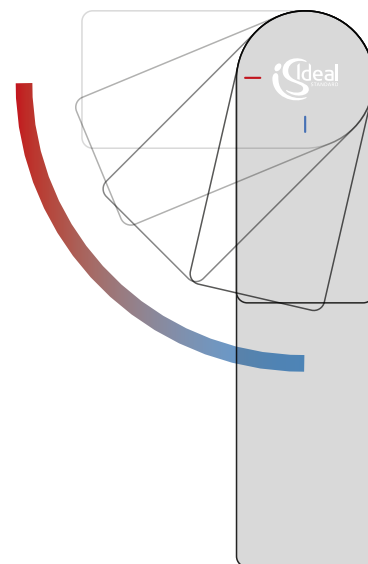

INNOVATIVE

We're focused on the future – and the evidence is in our past. In the 1960s, we invented the Ceramic Disc Cartridge to control water flow with more durability. This delivered the first-ever non-dripping tap. We bring this spirit of innovation to our designs for your home.

BlueStart® saves energy by preventing your system from filling up with heated water when the handle is at the central position.

EFFICIENT

Today our innovations focus on reducing the impact on the environment. We can do this by using features like our 5l/min aerator, which minimises water consumption without impacting on your experience. But also by including our BlueStart® technology, which means that hot water will only flow when you need it, saving energy and costs.

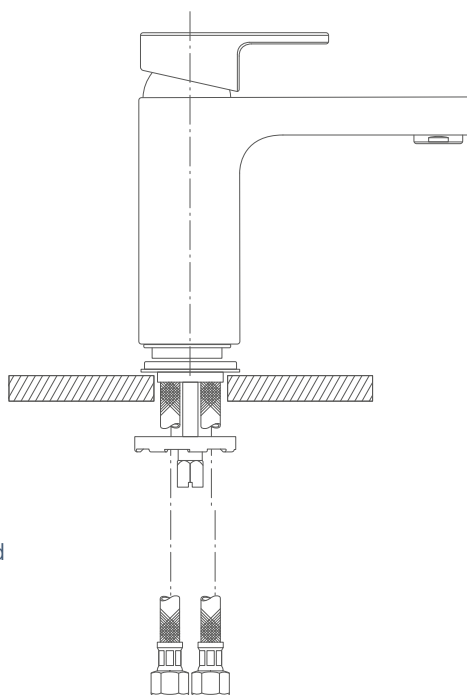

RIGOROUS

We're driven to meet and exceed European quality standards. We know that whether you're renovating your home or undertaking a professional project, you expect only the best. EDGE is compliant with the strictest of controls. When you discover EDGE, you also discover quality you can trust.

EFFORTLESS

We believe a good design should be fast and simple to install. We incorporate this thinking into our product development and have created our EasyFix® method for effortless installation. EasyFix® saves up to 30% on installation time.

EasyFix® speeds up installation. A single bolt with a sealing and non-slipping metal fixation centres the mixer automatically.

PROFESSIONAL

We're focused on excellence because you are. We're with you every step of the way, from making installation easier to saving energy and costs in the long term. A collection with style and strength, EDGE was designed to deliver your vision.

OVERVIEW

This is a modern design with a versatile geometric silhouette, and there's a model for any project.

You'll find a wide range of style-led pieces for the home but also a number of high-performance models with fittings specifically designed to increase durability and efficiency for large commercial projects.

These fittings bring significant cost savings over time, which is especially important for hotels, restaurants and public spaces. This is a complete collection for projects of any scale.

FIRMAFLOW®

Our high-performance cartridge withstands the most demanding environments and lasts nearly twice as long – available in selected models.

SLIMMER
and more durable too

500,000
cycles

10–15
years of daily use

SMOOTH
handling for effortless precision
and ultimate comfort

EASY TO INSTALL

Our EasyFix® method saves up to 30% on installation time.

ENERGY-SAVING

BlueStart® technology only releases heated water when you need it, reducing hot water usage.

WATER-SAVING

A 5l/min aerator reduces water consumption without impacting flow.

COMPLIANT

The collection meets the strictest European standards, ACS in France and DVGW in Germany, certifying quality.

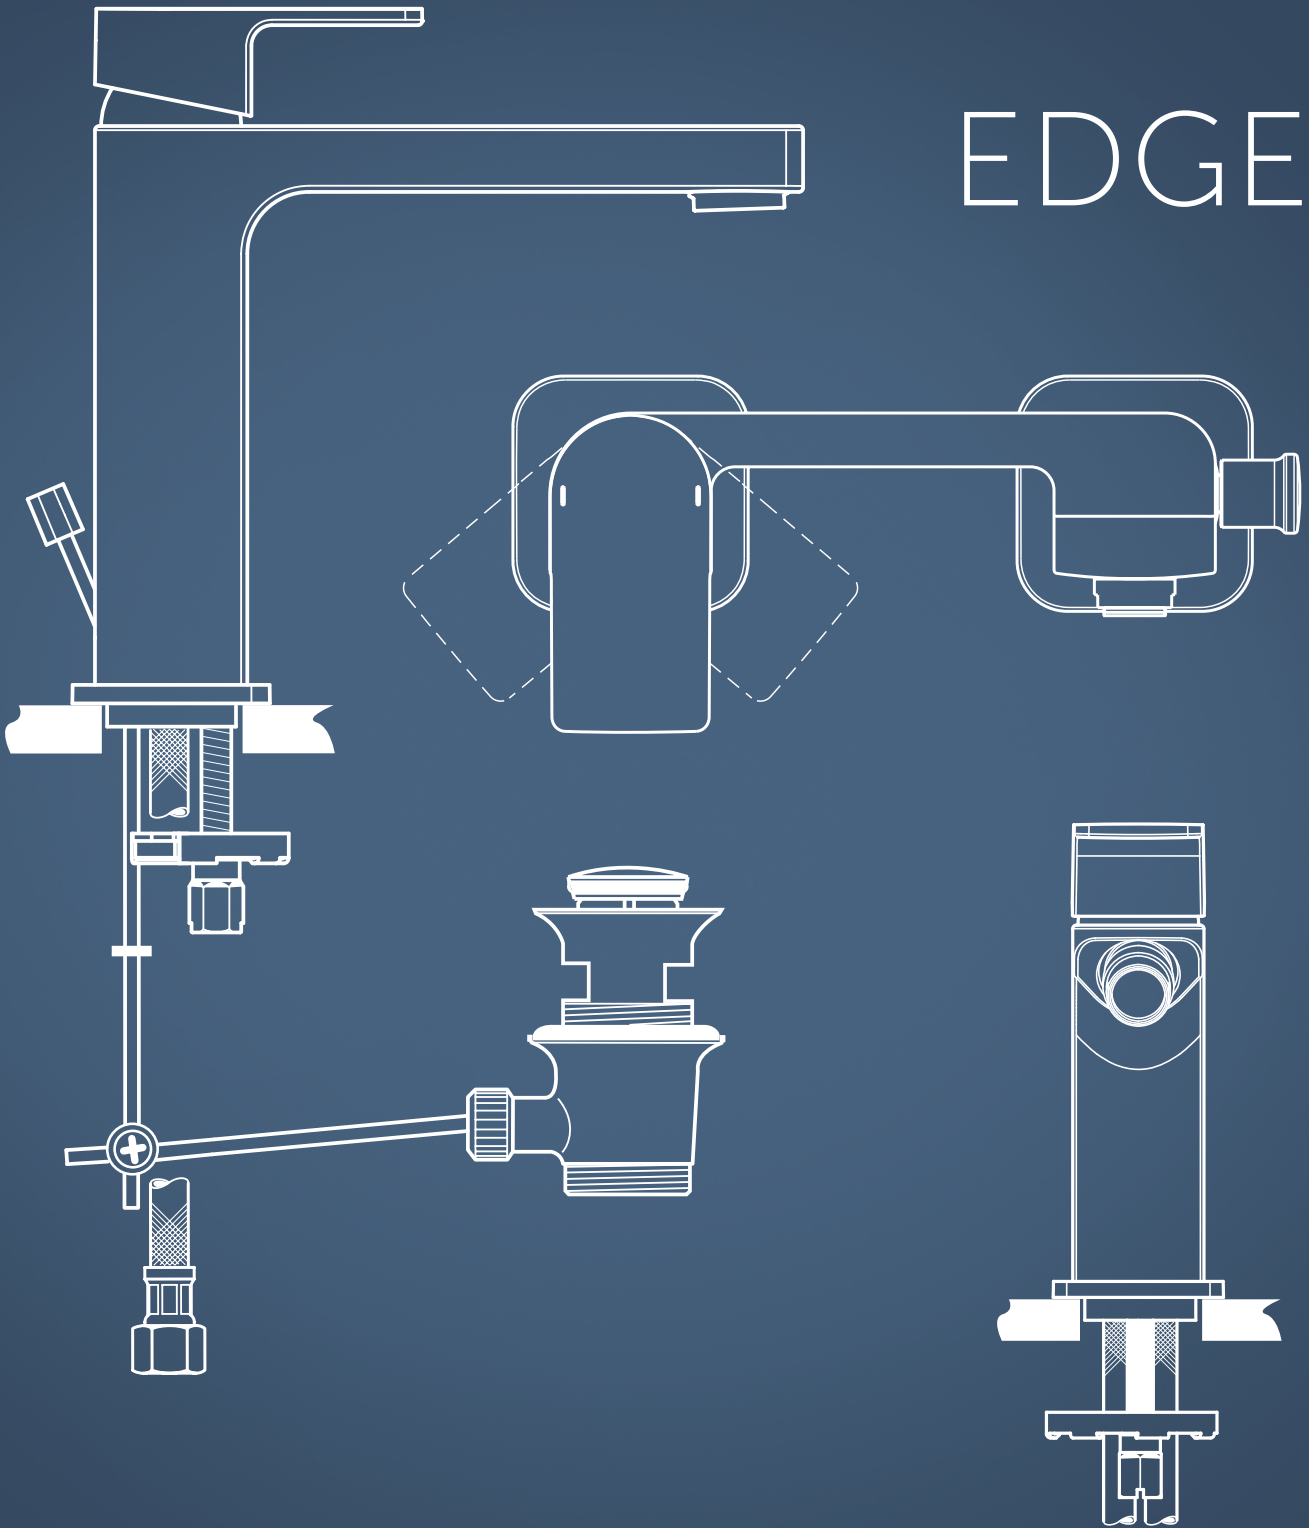

COMPLETE WITH WARRANTY

Finally, we want you to feel as confident as we are in our products, which is why we offer you our 5 year guarantee.
